FIG\_21

11/17

FIG\_22when  $a=1$ :

packet encodes a large change  
 | b | c | d | is seven bits of VW with no further encoding

when  $a=0$  and  $b=1$ 

packet encodes a small movement change  
 c = 3 bits quantified magnitude  
 d = 3 bits direction (Freeman code)

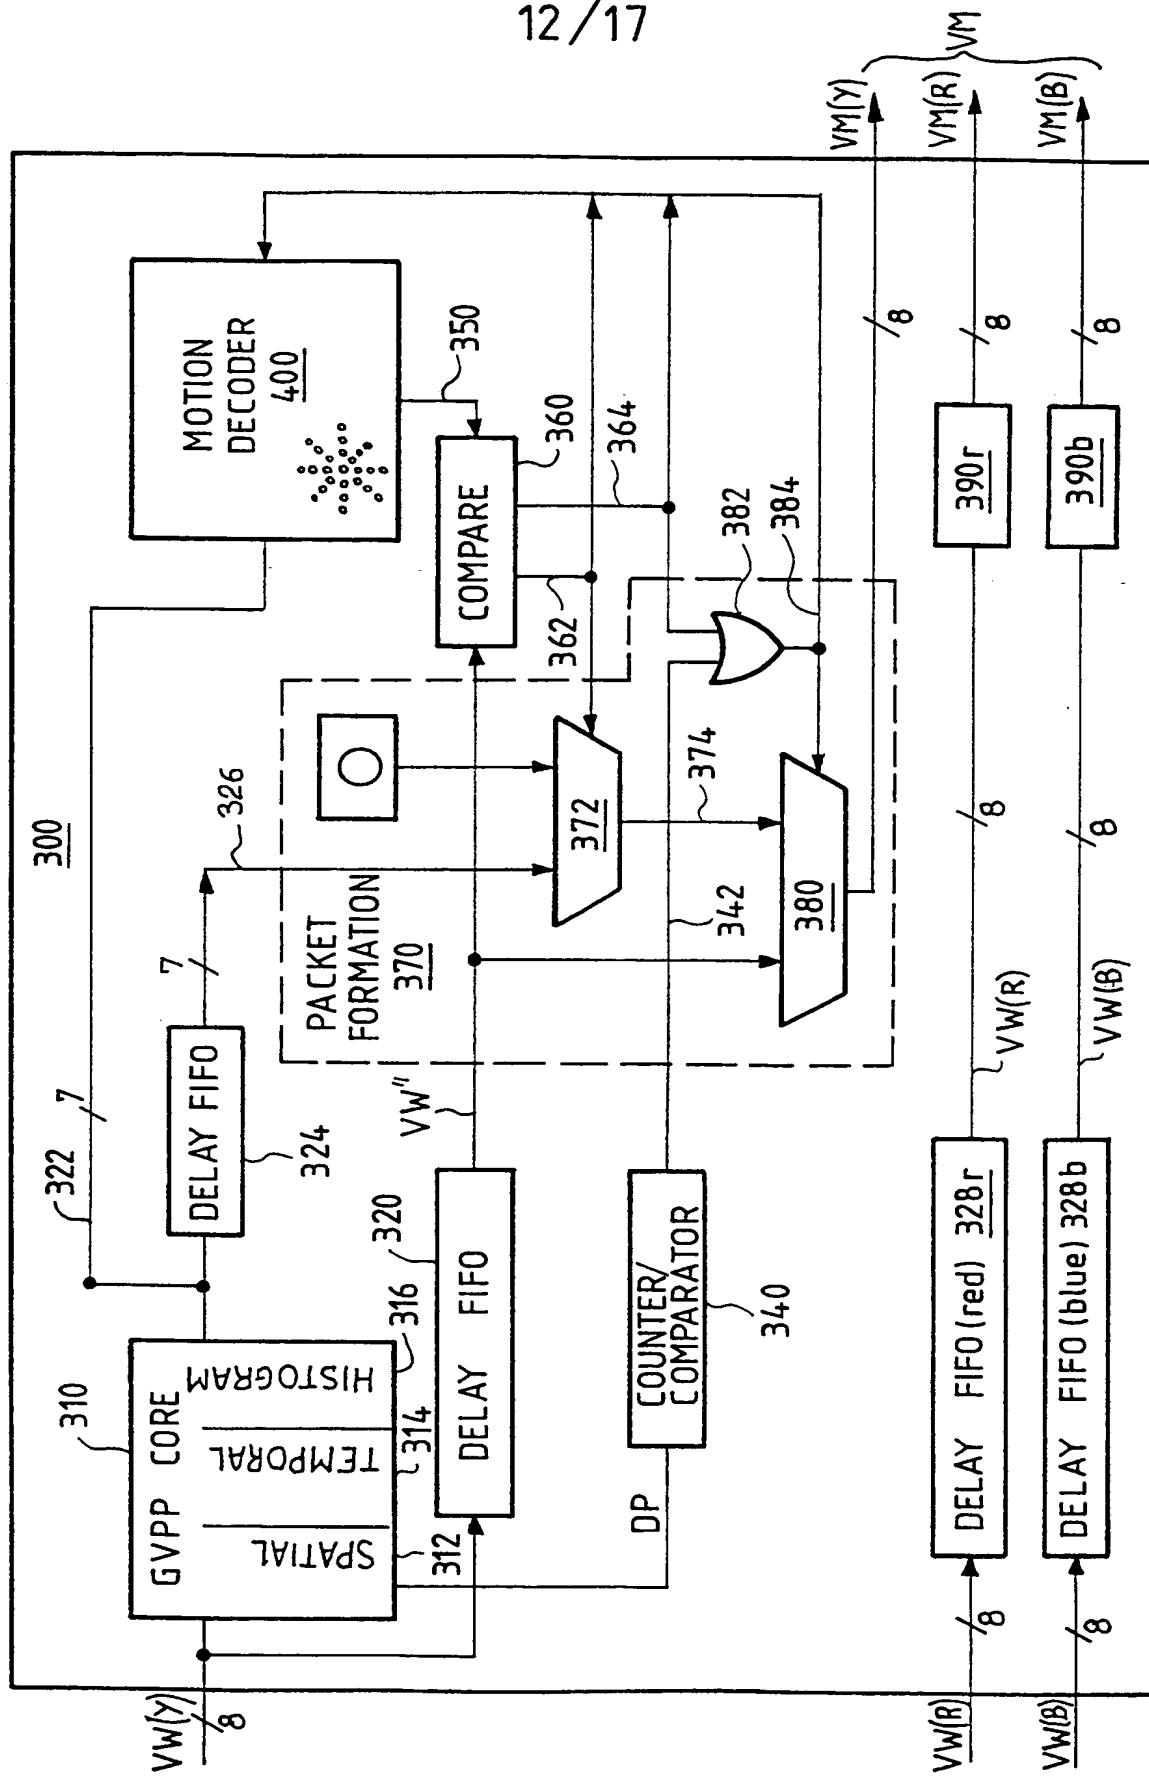

when  $a=0$  and  $b=0$ 

packet encodes a stationary pixel  
 c=0 and d=0
